NEW HORIZON COLLEGE OF ENGINEERING

Event Report on NDLI Book Hunt

The Library and Information Center of New Horizon College of Engineering, in collaboration with the National Digital Library of India (NDLI), and the Ministry of Human Resource Development (MHRD), organized an engaging NDLI Book Hunt Competition on 28th May 2025 in the college library.

The event was conceptualized with the outcome of enhancing student engagement with library resources, promoting collaborative learning through gamification, and fostering information literacy among participants.

The program commenced with a brief inaugural session, during which Dr. Anitha Rai, Director of Library and Alumni Relations, warmly welcomed the participants and introduced the concept and objectives of the NDLI Book Hunt.

The Book Hunt was designed as an interactive search activity across different sections of the library.

- Each participant was provided with a list of five book titles, including the corresponding authors.
- Participants were tasked with locating the correct copies of all five books within the library.
- Once identified, their selections were verified by the library staff for accuracy and correctness.
- The fastest and most accurate participants were declared the winners.

The competition concluded with the announcement of the top three winners, who were recognized based on their speed, accuracy, and successful task completion. Certificates and goodies were awarded as a token of appreciation and encouragement.

Additionally, valuable feedback was collected from the participants to understand their learning experience and to improve future events. The overwhelming response reflected the students' enthusiasm and increased familiarity with using library resources effectively.

The NDLI Book Hunt successfully blended Education with engagement, encouraging students to become more resourceful and informed users of library resources. The event reaffirmed the library’s role as a dynamic and interactive space for learning and exploration**.** By fostering curiosity, collaboration, and critical thinking, such initiatives not only promote academic excellence but also cultivate a community of independent and lifelong learners. The Library and Information Center remains committed to organizing more enriching experiences that bridge traditional learning with innovative approaches.
