

Library and Information Center

Report on the Library Orientation Programme

The Library and Information Center successfully conducted the Library Orientation Programme for First-Year Students on 7th October 2026 at the Main Auditorium, welcoming approximately 600 students into the institution's academic ecosystem. The programme was organised in two sessions to accommodate students from both academic cycles.

- Physics Cycle: 11:45 AM to 12:30 PM
- Chemistry Cycle: 1:30 PM to 2:15 PM

The sessions were led by Dr. Anitha S. Rai, Director – Library and Alumni Relations, who provided students with an informative and engaging introduction to the library's role in supporting academic learning, research, and personal development.

The programme commenced with a warm welcome to Dr. Anitha S. Rai by the faculty members of the Applied Sciences Department. This was followed by a comprehensive, student-centric presentation highlighting the library's resources, services, rules, and facilities. The session familiarised students with the various academic resources and support services available to enhance their learning experience and encouraged them to make effective use of the library throughout their academic journey.

The orientation programme established a strong foundation for information literacy, independent learning, and research awareness among first-year students. Through this initiative, the Library and Information Center reaffirmed its commitment to providing a supportive academic environment and promoting the effective utilisation of library resources and services. The programme concluded with an emphasis on the importance of the library as an essential partner in academic excellence and lifelong learning.

Glimpse of Orientation
